PRACTICE #4

Architecture

Requirements

1. Create a Login to authenticate through AWS Cognito service to have access to all backend resources.
2. List all URL's of AWS DynamoDB service and you must be able to reproduce them.
3. Create a Form with a text box of a maximum of 100 characters and a button to submit.

4. Create an API GW to a Lambda function to write the message to an SNS Topic.
5. Create a lambda function that will be triggered by each SNS notification, create an mp3 file with AWS Polly text-to-speech service and store it on s3. Store the URL of the previously generated mp3 file in AWS DynamoDB service.
